says he will have "the law" on all  
violators of the game laws.

Doctors recommend bowling as a  
harmless, healthful exercise.

The United States attorney's office  
in this city today received advices  
that nine alleged insurgents were  
taken into custody at Las Cruces yester-  
day. The men are charged with  
violating the neutrality laws. They  
will be given a prompt preliminary  
hearing. Such an offense as they are  
charged with is a serious one and  
may be punished by a penitentiary  
sentence.

The city health department was no-  
tified this morning through a reliable  
source that a pupil from a convent on  
the West side had returned home to  
Antonchico about ten days and had  
developed since leaving the school a  
case of smallpox. This indicates that  
many of the other pupils doubtless  
have been exposed to the disease.  
The health department urges upon  
everybody the necessity for being vac-  
cinated as this is one of the most cer-  
tain safeguards against the disease.  
Several cases of smallpox are report-  
ed in adjacent counties and surround-  
ing the city. The health department  
is taking every possible precaution to  
prevent an outbreak of the disease here.

A series of talks on practical sub-  
jects before the students of the High  
school is being arranged for by Super-  
intendent of Schools Rufus Meade.  
Prominent business and professional  
men will make the addresses, which  
will cover the subjects of health, care  
of the teeth certain phases of law  
and practical business. The talks will  
be given at intervals of from two to  
three weeks. R. R. Larkin opened the  
series today with a short lecture to  
the students. By this system the  
high school students will have an op-  
portunity to learn many useful things  
not taught in the school courses from  
the lips of men of experience and  
ability.

A special train made up of equip-  
ment of the California limited passed  
through here this morning on the way  
from Los Angeles to Chicago. The  
train was being deadheaded and many  
travelers cast wistful glances at the  
luxuriously equipped coaches. The  
traffic to California at this season is  
much heavier than the travel east-  
ward. For this reason the limited's  
equipment piles up in Los Angeles.

H. W. Cantrill, formerly Postal  
manager in Las Vegas, but who re-  
cently removed to Alabama, is now  
located at Vaughn, N. M., where he  
is employed as a railroad telegraph  
operator. The climate of the Gulf  
country did not agree with Mr. Can-  
trill, forcing his return to New Mex-  
ico.

The boys of the East Las Vegas fire  
department are getting up courage to  
ask the council to purchase a new  
team for them. A prominent Las Ve-  
gas horse dealer is planning to import  
some good horses and has told the  
firemen he will get them a dandy team  
if an order is placed soon.

Alderman B. F. Forsythe has let  
the contract for the erection of a  
substantial brick dwelling house on  
his ranch north of Las Vegas. E.  
Barber will build the structure.

E. Barber, who has the contract for  
erecting the markers for the old Santa  
Fe trail, says he will begin the work  
in about two weeks if the weather is  
sufficiently warm.

## THE IDEAL

SANITARY  
DAIRY

WHY?

Because of the Following Correct Conditions

1. Separate Concrete Floored Buildings.
2. Steam Sterilizing Ovens for bottles and all utensils.
3. Air-tight easily removed bottle caps.
4. The above conditions at least seem to have been entirely over-looked by all other milk producers in this vicinity.
5. City water exclusively or stock and cleansing purposes.
6. All cows tested by government official.
7. Up to date cooling and aerating system.

We wish to emphasize the first three conditions enumerated  
above, because of the importance attached to them by the city  
health boards throughout the country. These health boards realize  
the dangerous power of milk (especially warm milk) to absorb  
and multiply alarmingly, the disease bacteria which may exist in the  
milk vessels or in the air of the dwelling or wooden floored barn or  
in any room connecting with either.

Sixty feet of sunlight, the best germicide known, separate the  
milk room from all other buildings, at the IDEAL SANITARY DAIRY,  
successors to the Moye, Geyer and Corbett dairies.

We solicit your patronage and guarantee prompt service and  
dairy products at least equal in quality to those of any other pro-  
ducer.
